CAREER OBJECTIVE

Performance-driven and self-motivated 2nd Year undergraduate student pursuing Computer Science and Business Systems, with keen interest in software development and emerging technologies. Seeking a technical role or internship in a reputed organization where I can effectively apply my programming and analytical skills while continuously enhancing my technical knowledge and contributing to organizational goals.

EDUCATION

B.Tech – Computer Science and Business Systems

V.S.B Engineering College (2023 – Present)

CGPA: 8.90 / 10

Matric class 10 St.Antonys's matric higher secondary school,karur 95.2%

Matric class 12 Bharani park matric higher secondary school 91%

SKILLS

Programming Languages: C, C++, Java, Python

Core Concepts: Data Structures & Algorithms, OOPs, DBMS, Operating Systems

Embedded Systems: Sensors, Microcontrollers, Circuit Design (Basics)

Tools & Platforms: Git, GitHub, Arduino IDE, Linux, Windows

Soft Skills: Communication, teamwork, analytical thinking, adaptability

PROJECT EXPERIENCE

Water Quality Monitor

A water quality monitor is a system used to check the condition of water.

It measures parameters like pH, turbidity, temperature, and dissolved solids.

These values help determine whether water is safe for use or drinking.

The system uses sensors to collect water data.

A controller processes the sensor readings.

Results are shown on a display or mobile application.

It helps in early detection of pollution.

Water quality monitors are used in homes, industries, and environmental studies

HOBBIES & INTERESTS

Exploring emerging technology trends, coding and electronics-based projects, listening to music, watching sports.
